

The Multinational License

Frequently Asked Questions

What is the Multinational License?

The Multinational License is a complement to Copyright Clearance Center's (CCC) Annual Copyright License. It extends the Annual Copyright License's coverage to allow non-U.S. employees in more than 180 countries to reuse and share content with coworkers from millions of journals, blogs, newspapers, e-books and other copyrighted works represented in the CCC repertory.

What are the advantages of having the Multinational License?

This license saves significant time and money by streamlining the permissions and compliance process for your employees worldwide. With the Multinational License, there's no need for you to research copyright laws in multiple countries, gather permissions, and pay royalties to multiple parties because CCC handles all of that for you. In addition, because CCC rights holders agree not to pursue legal claims against our licensees for past actions falling within the scope of rights granted under the Multinational License, you gain important protection from potential litigation for copyright infringement.

How can I verify that a publication is covered under my Multinational License?

The Multinational License's repertory includes most publications covered by the Annual Copyright License, with a few exceptions.

Using the RightFind® Advisor tool (included with the Multinational License), you can quickly check permissions for specific content against the license

repertory. If your organization has not installed RightFind®, please contact your CCC representative to activate this resource.

I'm looking for a publication using RightFind® but I can't find it. How should I proceed?

- If the title is in our catalog, but is "not covered" by your license, you may use the "Request Coverage" option, which allows you to request the addition of a title to our repertory. Copyright Clearance Center will make every effort to add this valuable title to our catalog for reuse under your annual license agreements. We will notify you if we are able to include this title in future.
- If you are not able to find a specific non-U.S. title or publisher, we may be authorized to provide permission even through it is not listed in our catalog. Place a Special Order at www.copyright.com and CCC will work on your behalf to obtain permission. Additional fees will apply.

If you still can't find a title and would like us to add it to our catalog, contact us at info@copyright.com and provide the bibliographic information for the publication. We will research the publication to determine whether or not it can be added to our catalog for reuse under your license agreement.

How can I tell if my company has a Multinational License?

If you're not sure that your organization has a Multinational License from CCC, check with your corporate library or corporate attorney.

How are the license fees calculated for foreign employees?

The fee for the Multinational License is based on the total number of full-time-equivalent (FTE) employees in each country in which you operate.
