RightFind® Enterprise

The fastest way to find and manage content

Getting to the right content is critical for chemical companies, but without fast access to this vital published information, chemists and researchers cannot do their jobs effectively, slowing the pace of innovation.

RightFind Enterprise streamlines content management, by providing immediate access to your company’s scientific literature resources and improving operational efficiency. By consolidating multiple workflows and tools in an integrated and scalable solution, RightFind Enterprise can help information managers demonstrate multi-source content ROI in minutes.

RIGHTFIND ENTERPRISE BENEFITS

- Leverage the most comprehensive scientific information collection to drive innovation.
- Streamline content management to increase operational efficiency.
- Gain deep insight into content usage to make data-driven content investments.
- Optimize access to scientific information integrated into your users’ unique workflows.

HOW IT WORKS

1. Search using your preferred search tool such as PubChem, SciFinder, or Reaxys.
2. Get centralized access to documents and document purchasing to efficiently track and manage content spending. Simplify the authentication process for company subscriptions, open access, or internal collections.
3. Collaborate with colleagues in a copyright-compliant manner.
5. Manage content including subscriptions, Open Access sources, document delivery, and internal collections to improve operational efficiency.
POWERFUL CAPABILITIES TO INCREASE OPERATIONAL EFFICIENCY

- **Fast Document Delivery:** RightFind Enterprise delivers over 1.5 million documents annually, with the quickest document turnaround time in the industry, with the vast majority of documents delivered instantly.

- **Robust Scientific Literature Catalog:** RightFind Enterprise's proprietary database comprises the world's most comprehensive collection of scientific literature, including more than 120 million citations and free access to 18,000 open access journals and hybrid open access articles from more than 20 publishers.

- **Seamless Workflow Integration:** RightFind Enterprise supports users' current workflows, including OpenURL links from preferred search and discovery tools, such as SciFinder or Reaxys. Our QuickCheck bookmarklets allows users to request content from any website, and the embedded search widget launches RightFind Enterprise searches from your organization's internal websites. With the Chrome extension users can quickly request content from SciFinder, PubChem, Reaxys, or their preferred search tool. The RESTful APIs make application integration easy.

- **Shared Libraries:** RightFind Enterprise facilitates copyright-compliant collaboration within teams, from simple workspaces to highly customized content workflows based on role, (e.g. Safety, Regulatory, competitive intelligence, and more).

- **Flexible Administrator Features:** RightFind Enterprise provides flexible tracking fields, billing options, cost controls, and notifications for the entire company, and at a granular level such as division, department, or team to support an organization's specific structure and workflows.

- **Powerful Content Usage Reporting and Analytics:** RightFind Enterprise includes robust reporting to monitor content usage and spend across all users and organization levels with over 100 customizable fields providing the data you need. You can gain even deeper insight into content usage to make data-driven content decisions with 25 reports that make it easy to customize a dashboard to tell your content ROI story.

- **Simplified Copyright Compliance:** RightFind Enterprise works with your CCC/RightsDirect Copyright License to show exactly how you can share and reuse published material.
