RightFind Navigate and RightFind Enterprise Together

Power innovation by unifying content and data discovery and strengthening copyright-compliant collaboration

Biotech and life science companies must accelerate research and drive innovation to compete effectively, but when content that is essential for research is siloed, it hinders discoverability and slows the pace of innovation. Knowledge workers need to discover relevant information across a spectrum of sources without having to do the same search over and over again.

RightFind Navigate unifies global life science patents, critical public data sources, and high-value scientific literature via seamless RightFind Enterprise integration, all within a scalable open integration ecosystem. This powerful combined solution allows organizations to centralize content discovery and access, enabling knowledge workers to find the right content at the right time, while strengthening copyright-compliant collaboration to drive innovation.

Aggregated search: Start your discovery in RightFind Navigate with a unified search experience that displays meaningful results and enables connections across multiple data sources.

Personalization: With explicit and implicit personalization models that incorporate user activity, machine learning, and preferences, each user gets the content most relevant to them. Users also have the flexibility to turn personalization on and off.

Document delivery: Get the content you and your colleagues need anywhere, anytime. Easily find the content you need with seamless the integration of RightFind Enterprise’s database of more than 140 million citations, including 3 million open access articles.

Global patent searches: Find global life science patent documents quickly. Uncover hidden information in millions of patents from 98 countries.

Scalable open integration ecosystem: Increase discoverability by bringing together siloed public data, millions of global patents, and RightFind Enterprise’s robust catalog of scientific literature.

Strengthen copyright-compliant collaboration: Use RightFind shared libraries to facilitate copyright-compliant collaboration within teams based on role (e.g., Medical Communications, Competitive Intelligence, Regulatory, Research, Patent Filing, and more).
**RightFind Navigate benefits**

- Unify the search experience for smarter discovery
- Personalize results based on what’s relevant to each user
- Bring together global patents and public data sources with scientific literature through seamless RightFind Enterprise integration
- Centralize access to content anytime, anywhere
- Strengthen copyright-compliant collaboration

**Why CCC?**

At CCC, we help companies manage vast amounts of published content, critical public data, and proprietary internal information and data. We have a proven track record of working with a wide range of companies from small biotechnology firms to large global enterprises to unify data sources and make content more discoverable. We are experts in processing data from nearly all major publishing houses and metadata aggregators accounting for more than 120 million unique records per year across a diverse set of industries.

**About CCC**

A pioneer in voluntary collective licensing, Copyright Clearance Center (CCC) helps organizations integrate, access, and share information through licensing, content, software, and professional services. With expertise in copyright and information management, CCC and its subsidiary RightsDirect collaborate with stakeholders to design and deliver innovative information solutions that power decision-making by helping people integrate and navigate data sources and content assets.
