RightFind® Enterprise

The fastest way to find, manage, and collaborate on content

THE WAY WE FIND, MANAGE, AND COLLABORATE ON CONTENT IS CHANGING

With an average 8,000 scientific articles published every day, finding relevant, trusted information and staying on top of the latest research isn't easy. Without fast, secure access to this vital published content, researchers cannot do their jobs effectively, slowing the pace of innovation.

At the same time, industry standards are evolving. With changing authentication methods and new licensing models, like open access, it's imperative for employees to have an intuitive interface to find and access content from subscriptions, token accounts, document delivery and other sources. For information professionals, having a simple way to analyze return on content investments provides a better opportunity to play a strategic role in their organizations.

RIGHTFIND ENTERPRISE PROVIDES CENTRALIZED ACCESS TO CONTENT ANYTIME, ANYWHERE

RightFind Enterprise provides immediate access to scientific literature and data, enabling faster discovery and insights and strengthening copyright-compliant collaboration. A simplified user experience replaces multiple information tools with a single, comprehensive solution, and helps information managers demonstrate multi-source content ROI in minutes.

Whether you need sophisticated analytics to provide valuable insight into how published information is used in your organization, want to semantically enrich the search and reading experience for scientific articles, or want to automatically format bibliographies with the styles and citations you prefer, RightFind Enterprise offers the capabilities you need in a single solution. Additionally, RightFind Enterprise integrates seamlessly with CCC's copyright licenses to make copyright-compliant collaboration easier.

HOW RIGHTFIND ENTERPRISE WORKS

RightFind Enterprise supports unique workflows for many users across the organization including R&D, pharmacovigilance and drug safety, medical affairs and medical information, competitive intelligence, regulatory, and more. Researchers can quickly obtain published information from company subscriptions, open access sources, document delivery and internal collections, and collaborate with colleagues around the world using content obtained through one central secure platform.

RightFind Enterprise helps information professionals get the most value from company subscriptions. Your organization can centralize document purchasing to identify potential new subscriptions, accelerating the flow of research, maximizing the value of your content investments, and streamlining your information management services.

POWERFUL CAPABILITIES TO FIND, MANAGE, AND COLLABORATE ON CONTENT

Whether you are an established information management center with many subscriptions and collections and a high volume of document delivery requests, an organization with a decentralized information management model, or a growing business with an emerging information management need, RightFind Enterprise is highly configurable and scalable to meet the changing needs of users across your evolving organization. Capabilities include:

- **Granular rights and subscription configuration –** Give users instant access to your organization's licensed content, in accordance with your company's publisher subscriptions, token accounts, annual copyright licenses, and more.

- **Fast document delivery –** Employees can purchase articles not available through company subscriptions. We deliver over 1.5 million documents annually, with the quickest document turnaround time in the industry. Nearly all orders are delivered in 24-hours, and the vast majority are delivered instantly.

- **Robust scientific literature catalog –** Finding and requesting content is easy. Use citation data to easily order the documents you need. RightFind Enterprise's proprietary database comprises the most comprehensive collection of scientific, medical, and technical content. Users can search across 120 million citations and 18 million full-text documents, 18,000 open access journals, and hybrid open access articles from more than 20 publishers.

- **Seamless workflow integration –** RightFind works the way your researchers do. It offers a range of ways to support existing workflows, including openURL links from preferred search and discovery tools, QuickCheck bookmarklets to request content from any website, an embedded search widget to launch RightFind Enterprise searches from your organization's internal websites, the Chrome extension to quickly request content from Google Scholar, PubMed, SciFinder, or your preferred search tool, and RESTful APIs for application integration.

- **Flexible administrator features –** Customizable tracking fields, billing options, cost controls, and notifications are available for the entire company, as well as at a granular level such as division, department, or team to support an organization's specific structure and workflows.

- **Powerful content usage analytics –** Robust reporting allows administrators to monitor usage and spend across all users and organization levels with over 100 customizable fields.

SEARCH using semantic technology to find relevant content fast. You can also search for content using RightFind, Google Scholar, PubMed, SciFinder, or other preferred search tools.

GET secure and direct access to full-text articles and simplify the authentication process for company subscriptions, open access, or internal collections. Purchase articles directly through RightFind Enterprise.

GAIN INSIGHTS through an intuitive and semantically enriched full-text reading experience.

COLLABORATE with colleagues in a copyright-compliant manner.

REPORT on content usage and spending to make data-driven content investments.

MANAGE content including subscriptions, open access sources, document delivery, and internal collections.

GET THE MOST OUT OF RIGHTFIND ENTERPRISE

Turn Information into Knowledge

RightFind® Insight brings the power of semantic enrichment to the search and reading experience, turning information into knowledge and accelerating new discoveries.

Let the Data Tell Your Content ROI Story

RightFind Business Intelligence is the only solution to combine analytical tools for insights on content usage and spending with budget tools to help you justify your content investment.

Securely Access Content Anywhere, Anytime

RightFind Passport, powered by EZProxy, allows users to securely access your organization's content from any location, on any browser-enabled device.

Easily Manage References

RightFind Cite It is an easy-to-use reference management tool that automatically formats bibliographies with the styles and citations you value, saving you manual work and time.

Improve Text Mining Results

RightFind XML for Mining enables researchers to identify and download full-text article collections from multiple publishers through a single source and import that data into their preferred text mining software.

Add Expert Information Professionals to Your Team

Through Managed Knowledge Services, CCC provides highly skilled information professionals with expertise matched to your organization's unique needs and culture, delivering high-quality service and helping organizations get the most value from its content investments.
