

Setup Form for RightFind™ Advisor

Please complete this form, which will enable CCC to configure RightFind Advisor for your company. Note that most information is required. After receiving the completed form, CCC will create your secure instance of RightFind Advisor, usually within 2-3 business days.

1. Company Name *(required)*

Please enter how you would like your company name to appear in RightFind Advisor (e.g., XYZ, XYZ Corp., XYZ Corporation).

2. Article Rental or Purchase? *(required)*

RightFind Advisor allows end-users to rent or purchase articles. Please indicate whether you want CCC to turn off this feature.

Article rental:

Article purchase:

Note: If rental & purchase are both disabled, CCC will discuss with you whether article searching makes sense for your organization.

Please indicate whether someone at your company needs to approve rental or purchase requests by your company's employees (only available for invoiced orders).

Note: If approvals are required, CCC will contact you to get more information (e.g., names of approvers, approval limits, etc.)

3. Designated Contact for Your Employees *(required)*

Online help is available whenever a user has a question about RightFind. Each RightFind Advisor page also includes a link so users can send an email message to someone in your company (generally a library or legal staff person) if they have additional questions about re-using content. The email can go to an individual or an alias for a group.

Please provide the email address of the designated contact in your company for your employees:

4. IP Address Ranges *(optional)*

When RightFind Advisor has your company's IP addresses, users are able to access RightFind Advisor without logging in. If you do not wish to allow authentication via IP address, all users must register and login to access RightFind Advisor.

Typically, your company's IT department will know your company's IP address ranges. Also, if your company subscribes to online content, your corporate librarian may have the IP addresses since many content providers use IP addresses to grant access to their services.

Please fill in the following table with your company's IP address ranges. You can always add more IP addresses later. These are the IP addresses as seen by applications outside your firewall.
