The Annual Copyright License

Thousands of Publishers, Millions of Works, One Institution-Wide License

A license for today’s educators and learners

Colleges and universities depend on information. It is essential to every academic institution—from the classroom to the president’s office. But when the information is copyright-protected, it can be challenging to ensure that faculty, researchers, staff, and students have the rights they need to use and share it. And with the recent shift to remote learning, these challenges are often compounded by the complexities of how to share digital materials responsibly.

→ Broad coverage for all content users throughout campus

→ Quick and convenient “check & go” copyright permissions

→ Real savings—time and money
SHARE CONTENT WITH CONFIDENCE
The Annual Copyright License from Copyright Clearance Center is a single, multi-use license that provides faculty, researchers, staff and students campus-wide—whether in class or at home—with the copyright permissions they need to reuse articles and excerpts from millions of titles of copyrighted content, such as magazine articles, newspaper articles, book excerpts, poems, blogs, and more.

Created in partnership with colleges and universities, the license complements your school’s publisher agreements and subscriptions by providing a consistent set of reuse rights across a broad repertory of titles.

The Annual Copyright License provides:
- Broad coverage for all content users throughout campus
- Quick and convenient “check & go” copyright permissions
- Real savings—time and money

From coursepacks, electronic course materials and class handouts, to library reserves, administrative photocopies, internal email, intranet postings and more, the Annual Copyright License has you covered. The license enables faculty, researchers, staff, and students to reuse and share copyrighted content while respecting intellectual property rights.

Save time and money, and gain peace of mind
The Annual Copyright License greatly reduces the time spent securing copyright permissions. After you’ve obtained a legal copy of the content you’d like to use, you can quickly verify license coverage with CCC’s RightFind® Academic online search and verification tool, which is included with the license. So instead of ordering individual permissions and managing invoices, staff members can dedicate more time to higher value activities.
