

RIGHTFIND NAVIGATE BENEFITS:

- Get more value from your existing investments in content, data, and vocabularies
- Personalize results based on what's relevant to each user
- Accelerate insights by making information connections to enrich the R&D pipeline
- Unify the search experience to increase discoverability

RightFind[®] Navigate

Accelerate the return on content and data investments to drive innovation

R&D-intensive companies must accelerate research and drive innovation to compete effectively, but when content is locked away in silos it hinders discoverability and slows research. To maximize the value of digital information, organizations must eliminate silos to make content more discoverable and accessible.

RightFind Navigate breaks down inefficiencies caused by information silos by bringing together scientific literature, preprints, global life science patents, information on clinical trials, drugs, and research projects from publicly available data sources with licensed content and internal proprietary data in a single intuitive interface. Navigate also helps make information connections to power innovation, maximizes the value of an organization's content and data investments, and enables knowledge workers to quickly find relevant information.

KEY CAPABILITIES

Unify data sources

Eliminate data silos to increase awareness of content resources and maximize the value of your digital information assets with flexible pre-built or custom data connectors that enable fast, secure access to content and data.

Personalize the search experience

Find relevant content faster. RightFind Navigate uses explicit and implicit personalization powered by machine learning to incorporate user activity across the RightFind suite to deliver content recommendations specific to each user. Users can also turn this personalization on and off.

Smarter information discovery

Perform aggregated search via a single unified search experience that displays the data most meaningful to users and enables connections across multiple data sources.

Enable insights

Explore information relationships with semantically enriched, dynamic visualizations to accelerate insights by making information connections and enriching the R&D pipeline.

Seamless RightFind Enterprise integration

Centralize content discovery and access to RightFind's catalog of over 120 million citations and 2.4 million open access articles, and leverage the seamless integration of CCC's copyright in researchers' content workflows to simplify compliant content reuse, storage, and collaboration with colleagues.

The screenshot displays the RightFind Navigate search results for 'Coronavirus Biomarkers'. The interface is divided into several sections: a search bar at the top, a 'Refine Your Search' sidebar on the left with filters for 'By Year' and 'By Result Types', a main results area in the center, and a 'Content Insights' sidebar on the right. The results area shows a list of search results, including a patent, a journal article, and a clinical trial. The 'Content Insights' sidebar features a bar chart showing the frequency of various topics over time, with 'Severe Acute Respiratory Syndrome' being the most prominent topic.
