Copyright Clearance Center Announces Enhancements to Award-Winning Content Workflow Solution, RightFind

RightFind 7.9 Release Brings the Power of Semantic Enrichment and Search to Collaboration Workflows

August 6, 2019 – Danvers, Mass. – Copyright Clearance Center, Inc. (CCC), a leader in advancing copyright, accelerating knowledge, and powering innovation, announces enhancements to its award-winning content workflow solution, RightFind®, making it even easier to find relevant content and collaborate to turn information into knowledge.

The latest release advances functionality customers have come to rely on by expanding the power of semantic enrichment to the collaboration capabilities in RightFind. With this release, it becomes the first and only content workflow tool to use semantic enrichment to improve the precision of search alerts, ensuring relevant literature is not overlooked. Users can filter on key concepts, automatically tagging documents with relevant terms.

“As the amount of content and data continues to grow, content users need efficient ways to ensure that they don’t miss out on relevant information,” said Lauren Tulloch, Vice President and Managing Director, Corporate Markets, CCC. “Semantic enrichment drives the speed and precision of search and presents topic tags to give users an easy way to quickly find relevant content, make unexpected connections, and organize content for future reference.”

RightFind offers organization-wide secure retrieval of enterprise content and rights information, maximizing access to scientific, technical and medical (STM) journals, books, and databases, and reducing costs of managing information resources. Employees easily collaborate with team members in accordance with company policy for sharing content, simplifying copyright compliance. Optionally, RightFind customers can access targeted industry knowledge and information management expertise when needed through its Managed Knowledge Services team.

ABOUT COPYRIGHT CLEARANCE CENTER
Copyright Clearance Center (CCC) builds unique solutions that connect content and rights in contextually relevant ways through software and professional services. CCC helps people navigate vast amounts of data to discover actionable insights, enabling them to innovate and make informed decisions. CCC, with its subsidiaries RightsDirect and Ixxus, collaborates with customers to advance how data and information is integrated, accessed, and shared while setting the standard for effective copyright solutions that accelerate knowledge and power innovation.
