RightFind® Enterprise for Chemical Companies

The fastest way to find and manage content

Getting to the right content is critical for chemical companies, but without fast access to this vital published information, chemists and researchers cannot do their jobs effectively, slowing the pace of innovation.

RightFind Enterprise streamlines access to scientific literature, makes copyright-compliance easier, and improves research efficiency to power innovation. By consolidating multiple workflows and information management tools into an integrated and scalable solution, demonstrating content ROI in minutes has never been easier.

RightFind Enterprise benefits

- Provide fast access to a robust scientific catalog of more than 140 million citations and more than 3 million open access articles
- Streamline access to scientific literature to increase research efficiency
- Gain deep insights into content usage to make data-driven content acquisition decisions
- Integrate into your users' preferred tools to optimize their content workflow
- Simplify copyright compliance

How it works

Search using your preferred search tool such as PubChem, SciFinder, or Reaxys.

Get centralized access to documents and document purchasing to efficiently track and manage content spending. Simplify the authentication process for company subscriptions, open access, or internal collections.

Collaborate with colleagues in a copyright-compliant manner.

Report on content usage and spending to make data-driven content investments.

Manage content including subscriptions, Open Access sources, document delivery, and internal collections to improve operational efficiency.

Powerful capabilities to increase research efficiency

RightFind Enterprise Administrator Capabilities

- **Granular rights and subscription configuration:** RightFind Enterprise gives users instant access to your organization's licensed content, in accordance with your company's publisher subscriptions, token accounts, annual copyright license, and more.
- **Flexible administrator features:** RightFind Enterprise provides flexible tracking fields, billing options, cost controls, and notifications for the entire company, and at a granular level such as division, department, or team to support an organization's specific structure and workflows.
- **Powerful content usage reporting and analytics:** RightFind Enterprise includes robust reporting to monitor content usage and spend across all users and organization levels with over 100 customizable fields providing the data you need. You can gain even deeper insight into content usage to make data-driven content acquisition decisions with 25 reports that make it easy to customize a dashboard to tell your content ROI story.
- **Seamless workflow integration:** RightFind Enterprise supports users' current workflows, including OpenURL links from preferred search and discovery tools, such as SciFinder or Reaxys. Our QuickCheck bookmarklets allows users to request content from any website, and the embedded search widget launches RightFind Enterprise searches from your organization's internal websites. With the Chrome extension users can quickly request content from their preferred search tool, like PubChem. The RESTful APIs make application integration easy.
- **Authentication:** RightFind Enterprise simplifies the authentication process and provides direct access to content. It offers the ability to limit access to content by group or division, helping remote employees and organizations with non-static IP infrastructure to gain easier access to their high-value content. Additionally, it captures all content requests, tracking content usage down to the individual user level.

RightFind Enterprise End User Capabilities

- **Simplified copyright compliance:** RightFind Enterprise works with your CCC/RightsDirect Copyright License to show exactly how you can reuse published material.
- **Fast document delivery:** RightFind Enterprise delivers over 1.8 million documents annually, with the quickest document turnaround time in the industry with 85% of the documents delivered instantly and 96% of documents delivered in less than 1 day.
- **Robust scientific literature catalog:** RightFind Enterprise's proprietary database comprises the most comprehensive collection of scientific literature, including more than 140 million citations including more than 3 million open access articles.
- **Valuable supplemental materials:** Go beyond the article and get valuable insights about the content you need using a supplemental materials request workflow. The workflow lets you quickly request information available to support an article, including raw data, graphics, videos, graphs, and more.
- **Collaborative shared libraries:** Facilitate copyright-compliant collaboration to power innovation with the ability to customize content workflows based on role, e.g., Safety/Quality, Regulatory, Competitive Intelligence, and more.

About CCC
A pioneer in voluntary collective licensing, Copyright Clearance Center (CCC) helps organizations integrate, access, and share information through licensing, content, software, and professional services. With expertise in copyright and information management, CCC and its subsidiary RightsDirect collaborate with stakeholders to design and deliver innovative information solutions that power decision-making by helping people integrate and navigate data sources and content assets.
