WHAT'S NEW WITH MARKETPLACE?

Marketplace: October 2022 Release

Marketplace (marketplace.copyright.com) is a self-service, ecommerce site that enables people in business, higher education, publishing and other markets to quickly search, find, and purchase permissions to use and share content to conduct business, enrich instruction, and request article reprints and ePrints from thousands of publishers around the world.

With the October 2022 release, we offer:

- A new feature to make it easier for academic customers to update the number of students across multiple projects.
- Updated communication details for special requests.

Academic Customers Can Easily Update Number of Students

Updated Academic Projects Tab in Manage Account

We have added an option to “Change the Number of Students/Copies” in the Academic Course Content projects tab. Selecting this option allows customers to easily update the number of students in their open projects and save those changes, rather than having to open each project individually. See screenshot below.
