

2025 Copyrighted Content Usage Trends Report LAW FIRMS

For professionals at Law Firms, using content is essential for collaboration and greatly influences business development and communications, patent creation and defense, and litigation outcomes. Given the constant pressure around performance and achieving results, the behaviors and attitudes of professionals at Law Firms around content use and sharing requires attention as they seek to establish a competitive edge in an ever-changing landscape.

The widespread adoption of artificial intelligence (AI) tools is transforming how organizations analyze information, generate insights, and drive innovation, and is fundamentally changing the way users interact with content. Insights from the 2025 Copyrighted Content Usage Trends report help us understand how people think and behave in the context of copyrighted content consumption, use, and sharing, both within and outside the walls of their organizations, as well as how content is being integrated into AI workflows. Here's what we learned:

Importance of Content

Knowledge workers in Law Firms consider **10 different print or digital publications critical to their job function**.

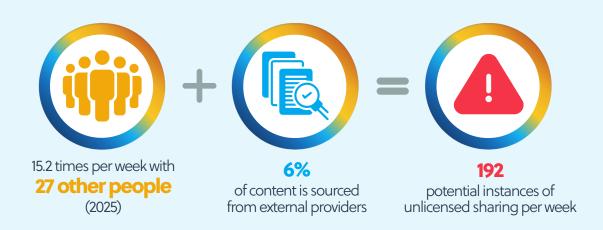

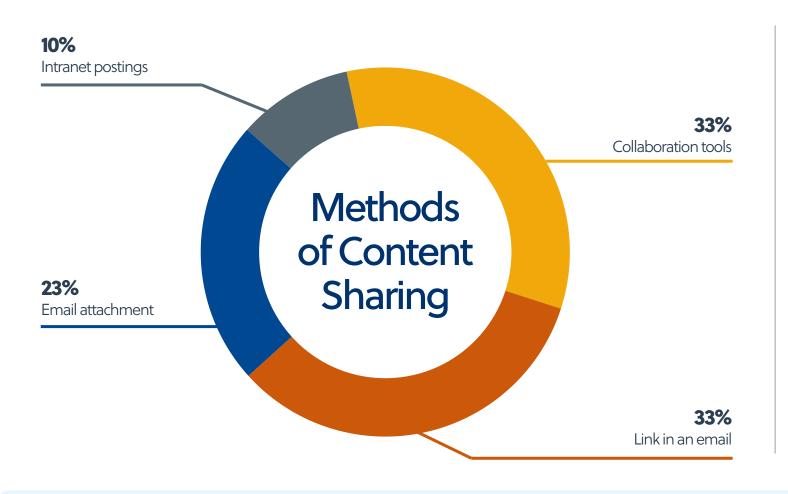

Types of externally published content used at work

The Velocity of Content Is Shifting

The number of people with whom information is shared in Law Firms has increased since 2023, with respondents sharing workrelated content **15.2 times per week with 27 other people**.

Considering that **46% of content is sourced from external providers** such as scientific journals, news sources, and other publications, there is **potential for more than 192 instances of unlicensed sharing per employee per week** if proper permissions are not in place.

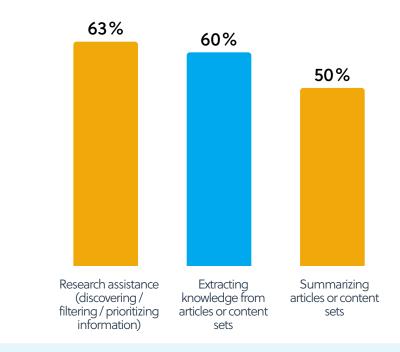

Adoption of AI Tools

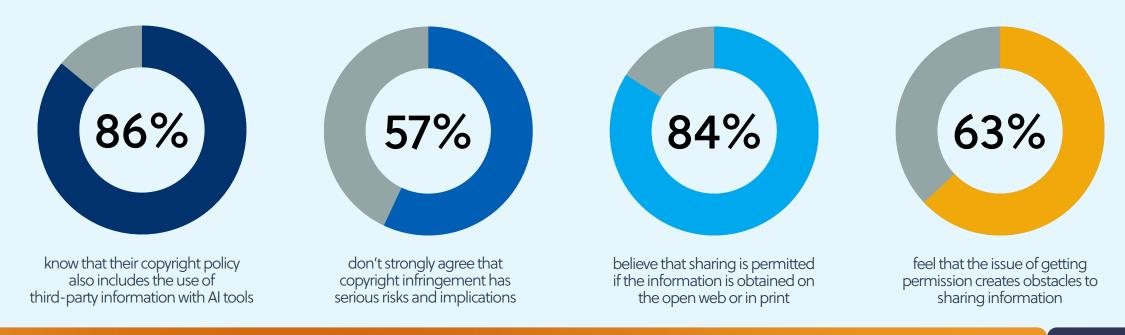

Businesses in nearly every industry are rapidly embracing AI, particularly generative AI, to revolutionize their operations, enhance productivity, and drive innovation. **One hundred percent of respondents in Law Firms reported using AI tools more than occasionally.**

Key Work-Related Tasks Where Respondents Report Using Content with AI Tools

Copyright Awareness and Attitudes

Companies are sharing their copyright policies more frequently, but employees are still sharing and using published content in new, potentially noncompliant ways. **Ninety-six percent employees claim** some level of awareness of their company's copyright policy. However, Outsell's newest research shows that employee attitudes and behaviors don't always align with policy awareness.

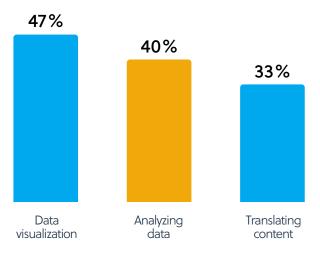

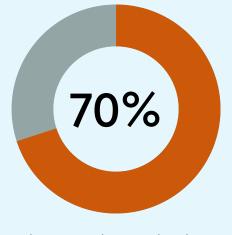

Why It Matters

The sharing of information with co-workers supports collaboration and drives innovation, and the use of AI tools increases the volume and speed that content can be consumed. However, the use of third-party content in a noncompliant way without first obtaining the necessary subscriptions, licenses, or permissions carries enormous potential risks, including copyright infringement, that can lead to costly lawsuits or settlements and have a negative impact on brand reputation.

By taking steps to balance employee reuse of published content with a strong compliance and licensing program, your company can leverage today's rise in content sharing to help support collaboration and drive innovation.
