WHAT'S NEW WITH MARKETPLACE?

February 2025 Release

CCC Marketplace (marketplace.copyright.com) provides a self-service e-commerce site that enables users who rely on the exchange and reuse of copyrighted content to conduct business and enrich instruction to search, order, and manage copyright permissions, purchase content, and request article reprints and ePrints across millions of works from thousands of publishers around the world.

The February 2025 release includes:

- The ability to group special requests by publisher within a project
- An improved Reprints/ePrints workflow
- Hover help text in search results
- UI improvements for required fields and additional tooltips

Group Special Requests by Publisher within a Project

Marketplace customers can now view special requests by publisher as part of a new Publisher View tab within projects. The List View remains the default view of special requests. Navigating to the Publisher View reveals all special requests by publisher, including a total of all priced requests, if applicable. See screenshot on next page.

Improved Reprints/ePrints Workflow

We continue to make improvements to the new reprints/ePrints workflow on Marketplace. We have added a new modal to better direct reprints/ePrints customers to the appropriate request form, whether they are looking for a reprints/ePrints request or a single article. See screenshots below and on the following page.

New reprints/ePrints modal asks users to confirm whether they are looking for reprints/ePrints or a single article.

Additional Help Text on the Search Results Page

We have added additional hover help text on the search results to inform customers of the appropriate path to take based on the permissions and/or content they are looking to purchase. The hover help text now appears for all available options within search results. See screenshots below and on the following page.
