

CCC Helps Emerging Life Science Companies Manage Scientific Literature Workflows with New RightFind Software Bundle

CCC Introduces One-Stop Solution for Small-to-Midsize Life Science Companies to Efficiently Access, Organize, and Collaborate on Scientific Literature

January 23, 2025 – Danvers, Mass. – [CCC](#), a leader in advancing copyright, accelerating knowledge, and powering innovation, announces its [RightFind Suite Growth Bundle](#). This one-stop software solution allows small- to mid-size companies to access, organize, and collaborate efficiently around scientific literature. Available via a single enterprise software subscription, the solution integrates features and functionalities from multiple products within the RightFind Suite, including semantic search across authoritative sources such as PubMed, integrated reference management capabilities, and data-driven content usage analytics.

The RightFind Suite Growth Bundle provides growing life science companies with an alternative to using multiple standalone literature solutions, many of which limit enterprise-wide access and can create information silos because of restrictive user-based licenses. As an ISO 27001-certified solution compliant with SOC 2 (Type-II) requirements, research-driven companies of all sizes have trusted RightFind Suite solutions to support their growth efforts and evolving scientific literature workflow needs for over two decades.

“We built the RightFind Suite Growth Bundle so emerging life science companies can more easily access the tools used by the largest life science companies in the world,” said Lauren Tulloch, Vice President and Managing Director, CCC. “It is a complete literature management solution that innovative companies trust to support the changing information needs across departments as their companies grow.”

CCC helps companies manage vast amounts of published content and proprietary internal information and data. As experts in processing data from thousands of sources across diverse industries, CCC has established a proven record of collaborating with many companies, including content providers and technology partners, to unify data sources and make content more discoverable. RightFind integrates seamlessly with clients’ annual copyright licenses to show how employees can reuse published material in their organizations.

CCC advocates for copyright worldwide by engaging governments, stakeholders, and individuals with [educational programming](#) and [thought leadership resources](#). The organization also maintains an online hub, [AI, Copyright & Licensing](#), which features informational resources for creators, publishers, rightsholders, technologists, media representatives, policymakers, intellectual property attorneys, and others.

Since 1978, CCC has supported content users by providing efficient, harmonized licensing solutions for their internal content uses. CCC’s non-exclusive voluntary collective licensing solutions include the Annual Copyright License (ACL) for Business, Multinational Copyright License (MCL) for Business, ACL for Higher Education, ACL for Curriculum & Instruction, and ACL

for Student Assessments. In addition to licensing solutions, CCC provides one-stop access for users to request, receive, and pay for full-text content and permissions to re-use content.

About CCC

A pioneer in voluntary collective licensing, [CCC](#) advances copyright, accelerates knowledge, and powers innovation. With expertise in copyright, data quality, data analytics, and FAIR data implementations, CCC and its subsidiary [RightsDirect](#) collaborate with stakeholders on innovative solutions to harness the power of data and AI.
